

Lease IPv4 Addresses

Unlock the full potential of your IPv4 network with our tailored leasing solutions. IPv4 address leasing is available to both parties with extra addresses to offer and those in need of immediate access — and we're here to make the process simple and seamless.

Leasing on the IPv4.Global Marketplace

IPv4.Global operates the world's largest and most trusted IPv4 marketplace. Backed by an extensive global network built through our buy/sell platform, we can source inventory across virtually any geography, block size, or niche specification—so lessees get the exact resources they need, when they need them. Our scale and reach translate into faster matching, reliable supply, and pricing that reflects real market conditions.

We take a consultative, high-touch approach to every lease. From first-time lessees to experienced operators, we listen closely to goals and concerns, guide clients through the process, and draft contracts tailored to specific technical and commercial requirements. IPv4 addresses are available for lease across a wide range of term lengths, in nearly every block size, and at multiple price points—providing flexibility to scale efficiently while maintaining control over cost and risk.

72+ million
addresses brokered

\$1.5 billion

The Benefits of Being a Lessee

For businesses in need of additional IPv4 resources, leasing offers an affordable and scalable alternative to purchasing. Leasing is ideal for startups, hosting providers, cloud services, and enterprises that require cost-effective IPv4 address solutions.

Lower capital expenditure by avoiding high upfront costs of purchasing IPv4 blocks.

Scalable IPv4 lease options that adapt to changing business needs.

Quick deployment of leased IPv4 addresses with full compliance and support.

The Benefits of Being a Lessor

For organizations with excess IPv4 addresses, leasing provides a profitable alternative to selling. If you're unsure about long-term IP needs, leasing allows you to generate passive income while retaining ownership of your IPv4 space.

Turn unused IPv4 addresses into revenue through secure leasing agreements.

Retain flexibility to reclaim IPs if business needs change.

Avoid permanent divestment while maximizing asset value.

End-to-End Service

We provide end-to-end support to make leasing IPv4 addresses as easy as possible:

Flexible Listing & Market Matching

We connect Lessors and Lessees with tailored matches, customized terms, usage types, and pricing suited to each client.

Comprehensive Contract Support

We manage end-to-end lease contracting—from drafting and coordination to execution and ongoing administration.

Automated Document Access

Agreements, invoices, and LOAs are securely stored and available for download through a structured, intuitive interface.

Transparent Invoice Workflow:

Track real-time invoice status, payment collection, and payouts directly within the platform.

Active Lease Dashboard

Stay on top of listings, active leases, and incoming IP requests in a single consolidated view.

Streamlined Operations

A dedicated delegation page centralizes all lease activity and simplifies IP provisioning requests—including ROA, RPKI setup, IRR entries, and geolocation updates.

About IPv4.Global

IPv4.Global is a division of Hilco Global (a subsidiary of ORIX Corporation, USA) focused on IPv4 address resources and network infrastructure services. In addition to supporting IPv4 buying, selling, and leasing, the organization provides consulting services related to network planning, transitions, data normalization, and IP governance, along with ProVision, its IP address management and network management platform designed to help network administrators plan, manage, and operate complex, distributed network environments. No matter your IP needs, we're here to help.

Expert Support

We provide dedicated support at every step to ensure a smooth leasing experience. Our team is available to assist with the technical setup, monitoring, and management of your leased IPv4 addresses. If you have any questions or need additional support, we are here to help.
